

Web based **Vehicle Tracking** & Mobile Data Solutions

SUMMARY.

Concepts-Online Explorer has proved itself to be a powerful, flexible and extremely useful tool in the day to day operation of our customers businesses. Although a cliché most of our customers would say that they could not operate now without having **Concepts-Online** on their PC's. We have proved that our system fulfils its promises and does indeed reduce communications costs, increase service call or delivery targets and helps control overtime claims, how often do you hear that a product promises much but does not really deliver? This is definitely NOT the case with **Concepts-Online**, ask any of our customers.....

Powerful yet simple to use, this has been one of our overriding principles since introducing the product, what is the point of having something that is difficult or fiddly to use? Flexibility is one of our strong points, **YOU** decide how **YOU** want your system to look and feel, we do not dictate how it should be viewed. How many maps do you want to see at one time – **YOUR** decision! Run reports without having your vehicles disappear off your screen. There are so many ways that our system can help your business.

We are able to offer you choices in how you fund our services, purchase or rental, any time period you wish. We are often asked over the phone "How much is your system?" Its almost impossible to answer without finding out what **YOU** want from our products and services, it's a bit like asking "How much are your cars?" when you walk into a car showroom.

The best way forward is to allow us to visit you and discuss exactly what you are trying to achieve, demonstrate how our system works - tailoring our presentation to your needs – and to discuss the pricing options with you. From there the decisions are yours. We are happy to provide customer case studies and references, our existing customers are our best adverts. We treat **ALL** of our customers as partners in our business and although you have probably heard sweeping statements like that before, talk to us – you may just find we are different!

Contact us to arrange for one of our team to come and see you and show you how we really can help.
